

OFFERBID

Investor Brief — Sustainability, Scalability & Business Model

OfferBid is a Cameroon-focused marketplace for second-hand products. It gives people a dedicated place to discover, list, negotiate and eventually transact second-hand goods securely. The Android app and website are live; iOS is planned.

THE OPPORTUNITY

People already buy and sell second-hand items through WhatsApp groups, Facebook communities and informal networks. The challenge is fragmented discovery, buried listings and limited trust. OfferBid organizes this existing behavior around searchable listings, offers and seller trust.

Thesis: We are not trying to replace WhatsApp. We are creating a dedicated marketplace for second-hand intent, while using WhatsApp as an early communication rail.

PRODUCT & SCALE

Today: discover → list → make an offer → connect through WhatsApp. **Long term:** discover → offer → agree → in-app chat → escrow → receive → confirm. OfferBid starts in Buea, expands across Cameroon, then enters additional African markets after establishing liquidity.

WHY OFFERBID

Existing channels	OfferBid
WhatsApp/Facebook groups: communication and community, but listings are fragmented and easily buried	Dedicated second-hand discovery, structured offers, seller trust and an eventual secure transaction layer

REVENUE ENGINE

Stream	Timing	Initial model
Promoted listings	Month 4	500 XAF / 3 days; 1,000 XAF / 7 days
Featured listings	Month 4	1,000 XAF / 3 days; 2,000 XAF / 7 days
Seller subscription	Month 6	1,000 XAF/month
Escrow	After Y1	2% of transaction value
Inspection	After Y1	2,000 XAF/request
Logistics	After Y1	2% commission on applicable delivery fees
Advertising	Future	Excluded from base case

TRUST & SECURITY

New accounts can currently list up to three items before verification is required. The planned Trust Passport combines verification, transaction history, ratings and other trust signals. Users can report suspicious listings. Escrow is intended to give sellers 24 hours to ship and buyers 72 hours after receipt to raise a dispute; inspection is optional. Payment/escrow implementation will use appropriate partners and applicable compliance requirements.

OFFERBID

3-Year Growth Targets & Illustrative Financial Projection

Target-driven base case: these figures are management targets for planning and investor discussion, not guaranteed forecasts.

GROWTH TARGETS

Metric	Year 1	Year 2	Year 3
Registered users	50K	120K	300K
Active sellers	10K	25K	60K
Successful transactions	10K	30K	80K
Average transaction	40K XAF	50K XAF	60K XAF
Projected GMV	400M XAF	1.5B XAF	4.8B XAF

PROJECTED MONETIZATION

Revenue stream	Year 1	Year 2	Year 3
Promoted + featured listings	Target	Target	Target
Seller subscriptions	Target	Target	Target
Escrow — 2% GMV	—	30M XAF	96M XAF
Inspection	—	3M XAF	16M XAF
Logistics commission	Variable	Variable	Variable
Advertising	Excluded	Excluded	Excluded

Inspection: Y2 = $30,000 \times 5\% \times 2,000 = 3\text{M XAF}$. Y3 = $80,000 \times 10\% \times 2,000 = 16\text{M XAF}$. Logistics is variable because delivery fees depend on distance, item and partner.

YEAR 1 PLANNED EXPENDITURE — ≈2M XAF

Expense	Basis	Year 1
Infrastructure	\$35/month × 12	≈237,300 XAF
Domain	\$15/year	≈8,475 XAF
Google Play	\$25 one-time	≈14,125 XAF
App Store	\$99 one-time	≈55,935 XAF
Marketing personnel	60K/month × 12	720,000 XAF
Marketing campaigns/acquisition	Remaining budget	≈964,165 XAF
TOTAL		≈2,000,000 XAF

KEY ASSUMPTIONS

Promoted listings are modelled around 30% of active sellers and featured listings around 20%, with two purchases per paying seller per year and a 50/50 mix of 3-day and 7-day packages. Subscription adoption targets are 5% in Y1, 7.5% in Y2 and 10% in Y3 at 1,000 XAF/month. Once escrow launches, 100% of successful transactions are assumed to use escrow at 2%. Advertising is excluded from the base case.

SCALE PATH

Year 1: establish liquidity across Cameroon, starting from Buea. **Year 2:** deepen Cameroon and evaluate a second African market. **Year 3:** target at least three African markets if Cameroon traction supports expansion. Long-term ambition: become a leading C2C second-hand marketplace across Africa.

Investor interpretation: GMV is the total value facilitated through OfferBid, not OfferBid revenue. The model is designed to validate marketplace liquidity first, then deepen monetization through visibility, seller tools and transaction infrastructure.
